EPA is committed to working closely with response agencies and state and local officials to ensure the safety of citizens, respond to concerns and to evaluate impact to water contaminated by the Gold King Mine Release. EPA is sharing information as quickly as possible with the public as experts work to evaluate any effects the spill may have on drinking water, public health, agriculture, fish and wildlife. Please see our website for the latest information: <http://www2.epa.gov/goldkingmine>
Regular updates will be posted as they are available.
EPA Hotline: 844-607-9700

Name: William Miller
Email Address:

Comments: An overly aggressive USEPA has pathetically destroyed the American southwest. The Animas River, the San Juan River, Lake Powell next, then the Colorado River. Whomever the contractor was that did this should be named. So far every single published information on this has hidden the incompetent contractor. This is a pathetic disaster that has essentially closed down much of the tourist industry in the southwest plus many other industries and businesses. Yea, EPA put up a 'claims' webpage. BUT, EPA Region 8 and Headquarters should be fully prosecuted, as well as the unnamed contractor EPA is protecting. What a bunch of incompetents who are overly aggressive in trying to kill American business. Terrible. Ever employee of EPA should be ashamed!
